

# Are you in need of funding for your school environmental program?

We know school budgets are tighter than ever.

## Get subsidised solar through Kids Teaching Kids Big Solar School Fundraiser for environmental education

### Kids Teaching Kids Big Solar School Fundraiser for environmental education in Australian Schools

Kids Teaching Kids is proud to announce MySolarDirect as the national sponsor of our program. Through this new partnership we will help schools fundraise for a new school vege garden, tree planting, new science equipment, teacher relief funding to participate in Kids Teaching Kids or other environmental programs, travel to Kids Teaching Kids events or environmental conferences and even a solar system for your school.

See other side for the full details

## How Does it Work?

For every residential solar system installed in your school community the **school will receive \$500**. There is no cap on the fundraising. For example, if your community encourages the installation of 10 rooftop solar systems **the school can invoice Kids Teaching Kids for \$5,000**.

### Next steps

1. Contact Kids Teaching Kids to let us know you are interested in taking part in the Big Solar School Fundraiser by emailing [office@kidsteachingkids.com.au](mailto:office@kidsteachingkids.com.au) or calling **(03) 8327 8481**.
2. We'll send you an expression of interest form to share with parents and community members to register their interest in finding out more about going solar with the Big Solar Schools community program.
3. KTK will send you information about the Big Solar School Fundraiser to place in your communication channels (this will cover school newsletter, social media platforms, school website, flyer for hard copy \*although we ask that you minimise use of paper).
4. Parents/community return the expression of interest form to your school and you send it through to KTK.

### The reward

For each solar system contracted through the program, the participating school is then advised to invoice Kids Teaching Kids for \$500 including GST. Please note: Kids Teaching Kids will require a simple 1-page form outlining what you intend to spend your money on. This form will ensure that your money is being spent on approved environmental projects and outcomes.
